

WONJIK KIM

GRADUATE DATA & REPORTING ANALYST | SQL | POWER BI | EXCEL

Wellington, New Zealand | Full NZ work rights | No sponsorship required

dajik03@outlook.com | [linkedin.com/in/wonjikkim](https://www.linkedin.com/in/wonjikkim) | dajik-03.github.io | github.com/DAjik-03

PROFILE

Recent AUT Data Science graduate with project experience in data validation, dashboard development and stakeholder-focused reporting. Strongest tools are SQL, Power BI and Excel, supported by R and Python. Known for checking data quality before analysis, documenting assumptions and limitations, and turning complex outputs into clear reporting for non-technical users.

CORE CAPABILITIES

Tools: SQL | Power BI | Excel | R | Python | GitHub | Quarto

Reporting & analysis: SQL querying | data extraction | dashboard development | KPI reporting | reconciliation | data validation and QA

Delivery: stakeholder briefings | plain-English insights | documentation | handover notes | assumptions and limitations

EXPERIENCE

AUT x Nestlé Academic-Industry Collaboration

Mar 2025 - Nov 2025

Industry Project Team Lead / Analyst

- Coordinated a 3-person reporting workstream within a 6-person project team, organising task ownership, sprint planning and final handover.
- Built Power BI reporting views that helped non-technical stakeholders review forecast outputs, compare outcomes and understand key drivers.
- Analysed product sales data and explained forecast movements, assumptions and limitations in plain language for presentations and decision discussions.
- Maintained methodology, sprint records, meeting notes and handover material so project decisions and reporting logic remained clear and traceable.

Hotel Pearly Plus

Nov 2023 - Feb 2025

Seasonal Reservations & Inventory Assistant

- Maintained Excel-based waitlists and inventory records during peak periods, checking discrepancies to keep booking and availability information accurate.
- Improved working templates and tracking practices to reduce avoidable errors and support reliable day-to-day operational decisions.
- Communicated with internal stakeholders in English and Korean to resolve booking and inventory questions quickly and accurately.

SELECTED PROJECTS

Justice Sector Reporting Scenario

2026

Power BI | Excel | Metric design | Stakeholder briefing | [View project on GitHub](#)

- Converted adult conviction counts and population estimates into comparable rates per 10,000 adults for Auckland and New Zealand over 2008-2017, then built a one-page Power BI briefing under a two-hour constraint.
- Found declines in both series, with Auckland remaining below the national rate; measured changes of -57.3 and -150.3 points per 10,000 adults respectively and identified the largest national offence-group contributors.
- Documented the population-alignment assumption and interpretation limits, positioning the result as a descriptive briefing rather than a causal or policy analysis.

NZ Road Safety Data Quality Review

2026 | SQL | DuckDB | R | Power BI | Data quality | [View project on GitHub](#)

- Validated 913,464 crash records across 72 fields using 12 rule-based SQL checks and a record-level exception register.
- Assessed the extract as fit for Version 1 annual and financial-year monitoring use, while isolating geographic completeness caveats for detailed local and map-based reporting.
- Built 8 monitoring views for Power BI and reconciled SQL with R across annual, financial-year, missingness and severity controls; all 12 release tests passed.

EDUCATION

Auckland University of Technology (AUT)

Jul 2024 - Dec 2025

Bachelor of Computer and Information Sciences - Data Science

- Achieved A / A+ grades across data analysis, forecasting and R&D coursework.

New Zealand Skills and Education College

Aug 2022 - May 2024

New Zealand Diploma in Software Development - Level 6

SELECTED TRAINING & CREDENTIALS

Microsoft Fabric (2026) | AWS Knowledge: Business Intelligence (2026) | Snowflake Data Warehousing (2026) | IBM Data Fundamentals (2026) | Google Analytics Certification (2026)
