WONJIK KIM

GRADUATE DATA & REPORTING ANALYST | SQL | POWER BI | EXCEL

Wellington, New Zealand | Full NZ work rights | No sponsorship required
dajik03@outlook.com | linkedin.com/in/wonjikkim | dajik-03.github.io | github.com/DAjik-03

PROFILE

Recent AUT Data Science graduate with hands-on experience in SQL, Power BI and Excel. Built a PostgreSQL analytics workflow for 12 months of official NZ electricity-market data, with data-quality controls, regional price-pressure analysis and a validated five-page Power BI report. Strong in data validation, reconciliation and clear reporting.

CORE CAPABILITIES

Primary tools: SQL | PostgreSQL | Power BI | Excel
Reporting & quality: dashboard development | data modelling | KPI design | reconciliation | rule-based validation | exception reporting
Additional: Python | R | DuckDB | Git/GitHub

SELECTED PROJECTS

NZ Electricity Market Analytics **Sep 2026 - Oct 2026**

PostgreSQL | SQL | Power BI | Data quality | Market analytics | *View project on GitHub*

- Built a PostgreSQL analytics workflow from official Electricity Authority data covering 17,520 half-hour intervals and 71.8M reconciled-volume rows, with versioned ingestion and 29 data-quality rules.
- Analysed National and regional price pressure in SQL and delivered a validated five-page Power BI report, identifying 88 half-hours of regional pressure not captured by the National P99 indicator.

Service Operations & SLA Performance Analytics **Jul 2026 - Sep 2026**

SQL Server | Power BI | Excel | Star schema | SLA analytics | *View project on GitHub*

- Designed a SQL Server star-schema warehouse for 60,000 service cases, implementing effective-dated SLA rules and pause-aware lifecycle measures.
- Reconciled 72 team-month backlog balances and surfaced 173 overdue cases representing NZ$200,450 in SLA exposure; delivered Power BI and Excel reporting for targeted follow-up.

NZ Road Safety Data Quality Review **Apr 2026 - Jun 2026**

SQL | DuckDB | R | Power BI | Data quality | *View project on GitHub*

- Ran 12 rule-based SQL checks across 913,464 crash records and 72 fields, creating a record-level exception register.
- Assessed the extract as fit for annual and financial-year monitoring while documenting geographic completeness caveats for local and map-based reporting.

ACADEMIC-INDUSTRY PROJECT

AUT Industry Project - Academic Collaboration with Nestlé **Mar 2025 - Nov 2025**

Project Team Lead / Analyst

- Coordinated a 3-person reporting workstream within a 6-person project team, organising task ownership, sprint planning and final handover.
- Built Power BI reporting views to compare forecast outcomes and explain key drivers to non-technical stakeholders.
- Analysed product sales data and documented forecast movements, assumptions and limitations for presentations and final handover.

EDUCATION

Auckland University of Technology (AUT) **Completed Dec 2025**

Bachelor of Computer and Information Sciences - Data Science

SELECTED TRAINING

Microsoft Fabric (2026) | AWS Knowledge: Business Intelligence (2026) | Snowflake Data Warehousing (2026)
