

WONJIK KIM

Graduate Reporting / Data Analyst | SQL, Power BI, Excel

<https://dajik-03.github.io/>

Recent New Zealand Data Science graduate with hands-on experience building dashboards, reporting outputs, and validation-focused analysis through industry and portfolio work. Strong in SQL, Power BI, Excel, documentation, and explaining findings clearly to non-technical users. Comfortable checking data quality before analysis, turning raw data into usable reporting, and supporting business decisions with clear written and verbal communication. Seeking an entry-level reporting, BI, or analyst role where accuracy, practical reporting, and stakeholder support matter.

CORE SKILLS

- SQL querying and data extraction
- Power BI dashboard development and reporting
- Excel reporting, reconciliation, and tracking
- Data validation, QA, and data quality review
- Reporting support and stakeholder-friendly insight communication
- Documentation, handover notes, and process clarity
- Business-facing presentation of findings
- Python (analysis & forecasting)
- R (analysis & modelling)

EXPERIENCE

AUT × Nestlé Industry Collaboration Industry Project Team Lead / Analyst

Mar 2025 – Nov 2025

- Analysed product sales data to support product prioritisation and forward planning discussions.
- Built Power BI reporting views to help non-technical stakeholders review forecast results, compare outcomes, and understand key drivers.
- Explained forecast movements, assumptions, and outputs in plain language for stakeholder presentations and decision discussions.
- Coordinated delivery across a 3-person development stream within a 6-person project team, helping organise task ownership, sprint planning, and project handover.
- Maintained clear project documentation, including methodology, assumptions, sprint records, meeting notes, and final handover material.
- Contributed to a structured, audit-ready working approach by keeping project artefacts organised and traceable.

Hotel Pearly Plus Seasonal Reservations & Inventory Assistant

Nov 2023 – Feb 2025 (Seasonal)

- Managed Excel-based waitlists and inventory tracking during busy periods, helping keep booking and availability records accurate.
- Checked operational data, identified inconsistencies, and resolved discrepancies to support day-to-day business operations.
- Supported internal reporting needs by keeping records up to date and usable for operational decision making.
- Communicated with internal stakeholders in English and Korean to confirm accurate booking and inventory information.
- Improved working templates and tracking practices to reduce avoidable errors in high-volume periods

Projects

Forecast Review Dashboard

SQL / Power BI Project

Dec 2025

- Built a SQL + Power BI dashboard to review forecast accuracy using product sales data from the AUT × Nestlé collaboration.
- Structured reporting views to help users compare forecast outputs, spot issues, and understand forecast drivers more easily.
- Improved forecast accuracy against the initial baseline through iterative testing, review, and QA.
- Delivered a handover-style walkthrough and supporting notes so the dashboard could be understood and used by non-technical audiences.

NZ Road Safety Data Quality & Monitoring Review

Portfolio Project

Mar 2026

- Carried out a validation-led review of publicly available NZ road safety data before deeper analysis.
- Checked field completeness, consistency, and severity exceptions to assess whether the dataset was reliable enough for reporting use.
- Produced monitoring-focused summaries across annual and financial-year views, with caveats written clearly for non-technical readers.
- Created reporting outputs in Excel, static visuals, and Power BI to support review, presentation, and ongoing monitoring use.
- Framed the final reporting position clearly: suitable for version-one monitoring use, with specific limitations noted rather than broad concerns.

EDUCATION

Auckland University of Technology (AUT) — Bachelor of Computer and Information Sciences (Data Science)
Jul 2024 – Dec 2025

- Achieved A / A+ grades across Data Analytics-focused coursework (Data Analysis, Forecasting, and R&D subjects)
- Tools used in coursework and projects: R, SQL, Excel, Power BI

New Zealand Skills and Education College — New Zealand Diploma in Software Development (Level 6)
Aug 2022 – May 2024

CERTIFICATIONS

- Microsoft Fabric (2026)
- AWS Knowledge: Business Intelligence (2026)
- Snowflake Data Warehousing (2026)
- AWS Knowledge: Amazon Connect Reporting & Analytics (2026)
- IBM Data Fundamentals (2026)
- Google Analytics Certification (2026)
